■ Dual core, Double Power

Equipped with the latest dual core technology, the F3Jp provides enhanced responsiveness to enjoy audio & video playback & record, gaming, IM, and web-browsing simultaneously on your notebook. Moreover, it offers outstanding dual-core performance to enjoy multimedia management and digital content creation.

■ Built-in high resolution webcam for wire-free video communication

With the built-in webcam supporting high resolution right out of the box, the F3Jp enables portable video conferencing without the hassle of bringing a bulky camera and tangling cables. Combined with ASUS LifeFrame2, an exclusive software program for convenient image recording, you can take group photos, film parties, see your pal's face when chatting online and host a video conference.

■ Enter the World of Visual Velocity with F3Jp

ASUS F3Jp delivers high performance 3D graphics effect, enhancing video playback quality, and extended battery life. A 90-nanometer process and hyper-efficient 3D architecture deliver supercharged graphics performance, enhanced by ultra-threaded operations and a new Ring-Bus memory controller. Lightning -fast GDDR memory boosts gaming performance, and full Direct X® 9 Shader Model 3.0 support enables astonishing effects and brings 3D games and applications to new levels of realism. Enhanced with ATI's revolutionary Avivo™ video display technology, Mobility™ Radeon® X1700 transforms your notebook into a superior home theater-quality mobile entertainment system.

■ ASUS Splendid Video Intelligence technology

The exclusive ASUS Splendid Video Intelligence technology is especially effective for human skin tones, green stretches of grass and trees and blue sky and sea. It takes PC graphics capability to the next level by enhancing depth and color intensity in real time. It further improves contrast, brightness, skin tone and color saturation for vivid image display. Incorporated with the

exclusive ASUS Splendid Video Intelligence Engine (activation hot key: Fn+C), the LCD presents clear and sharp images in their true vibrant colors.

■ **Triple Speed Connection with Wireless Freedom**

Responding to the emerging demands of notebook users who have a number of simultaneously working Bluetooth peripherals on their system, including mice, keyboards, headsets, and mobile phones, the F3Jp notebooks, with the built-in BluetoothR V2.0+EDR, offer maximum data transfer rates of 2.1 Mbps, 3 times faster than the current device can manage, and hence reducing power consumption, which greatly benefits battery-dependent mobile devices.

■ **Easier and Faster Digital Data Transmission**

The ExpressCard™ standard promises to deliver high- performance, modular expansion to notebooks at a lower cost and in a smaller form factor. You will be able to add memory communications and security devices by simply inserting ExpressCard™ modules into the F3Jp.

■ **Trusted Platform Module (TPM)**

The Trusted Platform Module (TPM) is a security device on the system board that will hold computer-generated keys for encryption. It is a hardware-based solution that helps to avoid attacks by hackers looking to capture passwords and encryption keys to sensitive data. The TPM allows the F3Jp to run applications securely and to make transactions and communications more trustworthy. When bundled with ASUS Security Protect Manager, it ensures overall system security, file protection capabilities and protect against email/privacy concerns.
