Standby Power

Standby Power is the electricity consumed by electronic appliances when not in use. Appliances such as your computer, monitor, printer or external hard drive do not completely turn off when you press the power button, instead they remain in standby mode, drawing a small amount of power even when you are not using them! With an abundance of electronic appliances in your home, the combined effect of these silent power consumers adds up fast.

Wireless Remote Switch

With up to a 20M range, this compact wireless remote works just like a light switch to conveniently turn off electricity to the remote switched sockets. Wall-mount snap fit bracket included.

Switched Sockets

Plug in devices that need to stay on continuously such as a computers, external hard drives and chargers.

Remote Switched Sockets

For devices that can be completely switched off when not in use, such as computers, monitors, printers and external hard drives.

Convenient Control

For greater energy savings and convenience, place additional Conserve units throughout the house. With a range of up to 20M, a single wireless remote can control up to 8 Conserve Surge Protectors.

Channel Selector

The Conserve Surge features 8 individual channel settings allowing you to control multiple units in different zones of your home with separate wireless remotes.

Description

Conserve Surge Protector with Wireless Remote

UPC

7 22868 70775 3

Technical Specifications

Continuous electrical duty rating: 240V/10A/2400W

Maximum Energy Dissipation: 1836 Joules

L-N: 612J

L-E: 612J

N-E: 612J

Maximum Spike Current : 72,000 Amps

L-N: 24,000A

L-E: 24,000A

N-E: 24,000A

Maximum Spike Volts: 6000

Response Time: <1 nanosecond

EMI/RFI Noise Filtration: 150kHz~100Mhz up to 58dB

Cord Length: 2M

Maximum Energy Dissipation: 320J (Tel)

Telephone Protection

Protect communications equipment from harmful power spikes

1-in, 2-out splitter
