

Belkin TunePower Rechargeable Battery Pack

Part # F8E490

The TunePower Rechargeable Battery Pack from Belkin keeps the music playing by letting you power your iPod—even when your internal battery is drained. It's a great solution for long plane flights, hikes, or for anytime you don't have access to an AC outlet. For your convenience, we've included three sleeves sized to fit all iPod and iPod mini players with dock connectors. The TunePower provides 8-10 hours of additional play time on all iPod models and it features a power-level indicator, so you can tell when your batteries are running low. The compact design fits easily in your pocket or carrying case so you'll never be caught without your tunes again.

The TunePower includes a detachable DC/FireWire cable that, when used with the Apple AC wall charger included with your iPod or any FireWire port, will charge BOTH the iPod and the TunePower simultaneously. The TunePower also features a protective case design to prevent dirt, dust, or impact from damaging the connector.

Advantages

- Works with all iPod or iPod mini players with dock connectors
- Includes 3 sleeves for 10/15/20GB iPod, 30/40GB iPod, and iPod mini
- Attaches securely with custom-molded sleeves to protect your iPod
- Includes a DC/FireWire Charging Cable that charges both your iPod and TunePower simultaneously when used with the Apple iPod AC power brick or any laptop or PC with a FireWire port
- Features a 2-Cell Lithium Ion Battery which offers cost-savings and convenience of recharging
- Comes with a Belkin 3-Year Warranty
- Colour: White/Silver
